Website Title: Documents of Leaders – Demis Hassabis

1.Aim of My Website

aim of my website is to provide users with information about Demis Hassabis, the CEO and co-founder of Google DeepMind. The website introduces his biography, achievements, contributions to Artificial Intelligence, and the vision of DeepMind. It also provides references and a contact page for users who wish to learn more about him and his work.

2. Target Audience

The target audience of this website includes students, researchers, AI enthusiasts, and anyone interested in learning about Artificial Intelligence and influential technology leaders. The website is designed in a simple and informative way so that users can easily understand the content regardless of their technical background.

Objectives

- Provide accurate information about Demis Hassabis.
- Explain the mission and vision of Google DeepMind.
- Showcase major awards and achievements.
- Provide reliable references and sources.
- Create an attractive and easy-to-use interface.
- Allow users to contact the website through a contact form.

3. Design Notes

Colour Scheme

The website mainly uses:

- **Dark Blue (#0033CC)** – Navigation bar and highlights.
- **Black (#000000)** – Main background colour.
- **White (#FFFFFF)** – Text and content visibility.

These colours were selected to create a professional and modern appearance that reflects the technology and Artificial Intelligence theme of the website. The dark background improves readability and helps images stand out.

4. Typography

The website uses bold and readable fonts for headings and content. Large headings are used to attract attention, while body text remains simple and clear for easy reading.

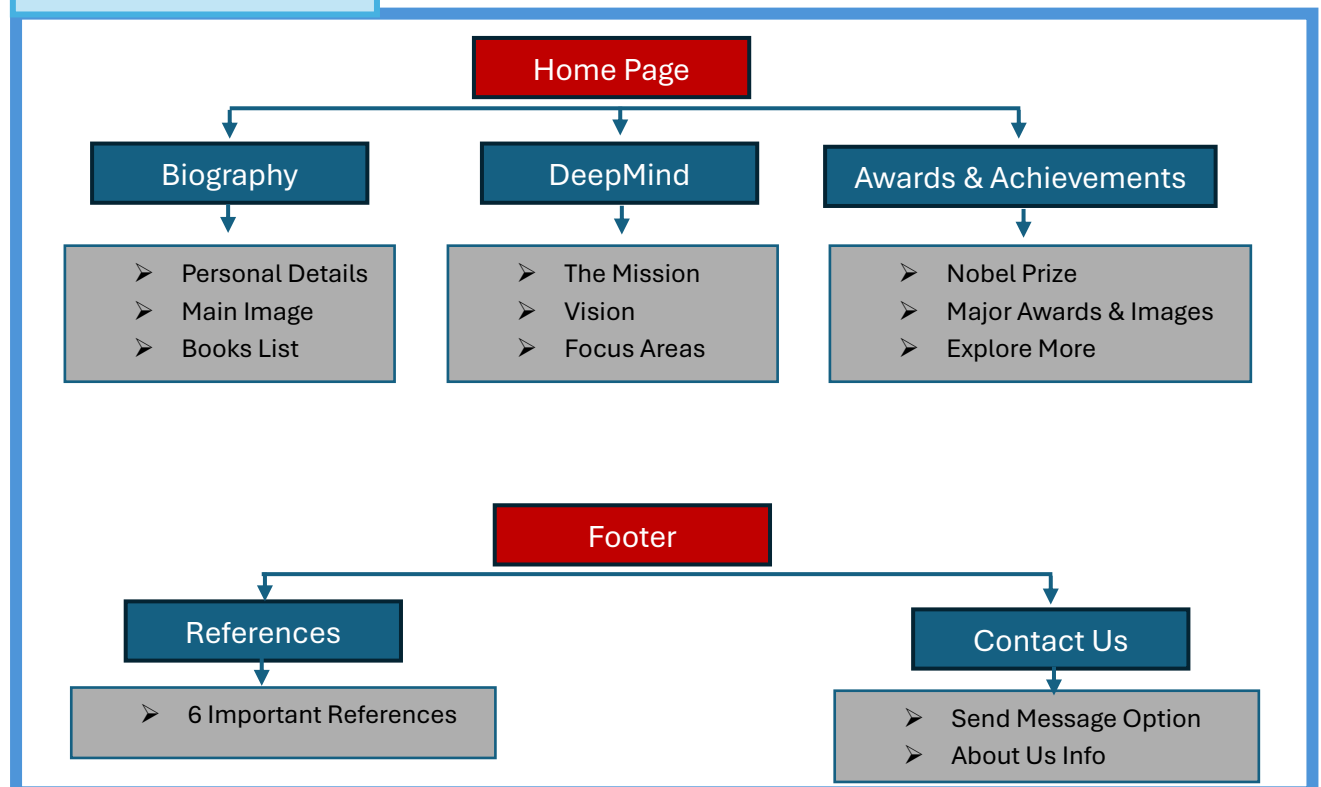

5. Navigation

The navigation bar is placed at the top of every page and contains:

- Biography
- DeepMind
- Awards & Achievements

Footer navigation buttons are also included to allow users to move between the References and Contact Us pages easily.

6. Site Map

7. Overall Design Approach

The overall design focuses on creating a modern, professional, and visually attractive website. A dark theme combined with blue accents was chosen to represent technology and innovation. High-quality images, structured layouts, and clear navigation help users quickly access information. The design ensures consistency across all pages while maintaining a strong Artificial Intelligence and technology-related appearance.

8. Conclusion

This website successfully presents important information about Demis Hassabis and Google DeepMind in an engaging and easy-to-understand format. The combination of informative content, attractive visuals, and simple navigation provides users with a positive browsing experience while learning about one of the leading figures in Artificial Intelligence.
